Underwriting

Underwriting

The Entitlement Offer will be underwritten by Veritas Securities Limited (the **Underwriter**) to the extent of 1,500,000,000 New Shares or A\$6 million under the terms of an underwriting agreement entered into between RRP and the Underwriter. Taurus Funds Management (**TFM**) will sub-underwrite the Entitlement Offer to the same extent pursuant to a sub-underwriting agreement with the Underwriter. TFM currently holds 31.86% of the issued capital in RRP, and may significantly increase its holding if the Entitlement Offer is not fully subscribed (see the table below).

In determining to proceed with the Entitlement Offer (including the terms of the underwriting and sub-underwriting arrangements), the Directors of RRP gave consideration to the fact that TFM has stated that it would not propose or support a delisting or capital consolidation of RRP within fourteen months of the completion of the Offer.

TFM owns 31.86% of the issued capital of the Company. TFM has entered into an agreement to sub-underwrite the Entitlement Offer. The following table sets out the ownership TFM may have after completion of the Entitlement Offer based on the assumptions that TFM take up their full entitlements and with differing levels of acceptances by the remaining shareholders:

Current Issued Capital: 425,808,576			
Acceptance by shareholders other than TFM	Funds raised	TFM Shareholding and percentage of voting power	Dilution of existing shareholdings
100%	\$7m	692,805,053 31.9%	0%
75%	\$6m	741,017,718 38.5%	-32.4%
50%	\$6m	1,039,230,383 53.9%	-55.2%
0% (i.e. only TFM takes up its Entitlements)	\$6m	1,635,655,713 84.9%	-77.9%

Underwriting

RRP has entered into an underwriting agreement with the Underwriter pursuant to which the Underwriter will underwrite the Entitlement Offer in an amount of \$6,000,000 (**Underwriting Agreement**).

(a) Fees

Underwriting and management fees of 4.33% of the underwritten amount (\$259,800) are payable to the Underwriter under the terms of the Underwriting Agreement. In addition, RRP must pay, or reimburse the Underwriter for reasonable costs and expenses incurred by it of and incidental to the Entitlement Offer, including but not limited to:

- costs and expenses in respect of the Underwriting Agreement; and
- any stamp duty payable in respect of the Underwriting Agreement.

(b) The Underwriter's obligation

If valid applications are not received for 1,500,000,000 New Shares by the close of business on the closing date of the Entitlement Offer and the Underwriting Agreement has not been terminated following a termination event, the Underwriter must lodge or cause to be lodged valid applications for the shortfall shares, being the number of shares that, together with valid applications, will result in the issue of 1,500,000,000 new shares to raise \$6 million.

(c) Termination Events

The Underwriter may, after consultation with the Company, terminate the Underwriting Agreement (and be discharged from the underwriting obligation) if a termination event occurs. If the Underwriter exercises its right to terminate the Underwriting Agreement, the Company is obliged to pay TFM \$50,000 plus GST and all expenses incurred by the Underwriter in connection with the underwriting up to the time of termination. The termination events are prescribed in the Underwriting Agreement and include the following events:

- non-compliance by the Company with ASIC or ASX requirements in relation to the Entitlement Offer or generally;
- misleading statements or misrepresentations made by the Company in the cleansing notice and offer documents in relation to the Entitlement Offer or otherwise made to the Underwriter in relation to the Entitlement Offer;

Underwriting

(c) Termination Events (continued)

- the Company issues an unauthorised public statement or makes unauthorised alterations to capital;
- a new circumstance occurs which is likely to have a material adverse effect on the Company that would have been required disclosure under the terms of the Entitlement Offer had it occurred earlier;
- the occurrence of any adverse or negative publicity or findings against either the Company or its directors that is likely to have an adverse effect on the Company;
- material breach by the Company of the Underwriting Agreement or termination or breach by the Company of any of its material contracts;
- insolvency or material adverse change in the financial position of the Company;
- the occurrence of a change of control in respect of the Company;
- the commencement of material legal proceedings or regulatory action against the Company by a person other than the Underwriter or the handing down of a judgment or equivalent for more than \$100,000 against the Company;
- disqualification of a Director (other than due to death or disablement);
- default by the Company under any finance facility of the Company;
- the introduction of regulatory changes (including in relation to taxation) that prohibit, are likely to reduce the level of application under or are materially adverse to the Underwriter's underwriting of the Entitlement Offer; and
- the occurrence of changes in economic, political and market conditions that are likely to have a material adverse effect on the success of the Entitlement Offer.

(d) Indemnity

RRP has also agreed to indemnify the Underwriter and its officers, against any claim, proceedings, damage, costs or expenses arising from any false or misleading statement in, or any material omission from, the Offer Documents, and certain other wrongful conduct by RRP.

NOT FOR DISTRIBUTION OR RELEASE IN THE UNITED STATES

Key risks

This section discusses the key risks attaching to an investment in RRP, which may affect the future operating and financial performance of RRP and the value of RRP shares. Before investing in RRP shares, you should consider whether this investment is suitable for you having regard to publicly available information (including this presentation), your personal circumstances and following consultation with financial or other professional advisers. Additional risks and uncertainties that RRP is unaware of, or that it currently considers to be immaterial, may also become important factors that adversely affect RRP's operating and financial performance.

- **Entitlement Issue Risk**

- Underwriting (Note: As the Entitlement Offer is conditional on Shareholder approvals being obtained, the Entitlement Offer will not proceed if the requisite majority of non-associated Shareholders do not vote in favour of both Resolution 1 and Resolution 2 at the general meeting. It is important to refer to the Notice of Meeting dated 25 Sept 2013 for a description of associated risks. The Notice of Meeting is available on the Company's ASX platform and has also been mailed to shareholders.)
 - The Entitlement Issue is being partially underwritten by the Underwriter. Investors should be aware of the terms of the Underwriting Agreement as outlined in this presentation, which includes certain termination events that may not be within the control of RRP, including changes in the political, economic and regulatory environment.
 - Investors should be aware that if the Underwriter terminates the Underwriting Agreement the RRP Board of Directors will be required to meet and to determine whether the Entitlement Offer can or should continue.
- Potential control transaction and reduced liquidity
 - As is detailed in this Presentation, TFM as sub-underwriter has the potential to significantly increase its ownership of the issued capital of the Company. TFM may hold up to 84.9% of the issued capital of RRP and may gain control over TFM without paying any "control premium". Further, an increase in TFM's shareholding may adversely affect the liquidity of RRP shares (that is, the ability of eligible shareholders to trade their shares) and have a consequential adverse effect on the market price of RRP shares.
- Implications of Shareholders not taking up their Entitlements
 - Existing RRP shareholders' interests will be significantly diluted if they do not take up their Entitlements.
- Potential De-listing of RRP
 - If TFM's interest in the Company's shares becomes such that the ASX is not satisfied that there remains an orderly and liquid market in the securities, quotation of the Company's shares on the ASX may be suspended and, ultimately, RRP removed from the ASX official list. However, as noted on slide 9, TFM has stated to the Board of RRP that it will not support a delisting within 14 months of the completion of the Entitlement Offer.

Key risks

- **Entitlement Issue Risk (continued)**
 - Compulsory acquisition by TFM
 - If TFM becomes a "90% holder", as defined in section 664A of the Corporations Act, of ordinary shares in RRP, it may have the right to compulsorily acquire all the remaining ordinary shares that neither TFM nor any related bodies corporate of TFM has full beneficial interests in. TFM's ability to undertake such a compulsory acquisition will be dependent on it complying with the provisions of the Corporations Act and any other applicable laws. TFM will not have the ability to become a "90% holder" as a result of the Entitlement Offer but may, subject to the Corporations Act, subsequently increase its holdings of shares in the Company.
 - Suspension
 - As the Company's shares are currently suspended, shareholders are not able to assess the value of the Entitlement Offer by reference to the current market price.
- **Operational Risks**
 - Strength of natural resources and coal sector
 - RRP's future is influenced by the general state of the resources sector and in particular the coal market, and coal prices
 - Achievement of forecasts
 - RRP has based its business plans on a mine plan and financial model, the achievement of which is dependent on a number of factors, some of which are outside RRP's control (e.g. license delays, coal price, wages fuel, material exchange rates and other inputs).
 - Dependence on key management personnel
 - The operating and financial performance of RRP is largely dependent on its ability to retain and attract key management personnel. Whilst RRP makes every effort to retain key management personnel, there can be no guarantee that it will be able to do so. Any loss of key management personnel could adversely affect RRP's business, results of operations or financial conditions and performance.
 - Requirements for unforeseen capital expenditure
 - RRP's business may require significant unforeseen capital expenditures
 - Financial position and funding requirements
 - RRP's ability to complete current and future project development will depend on the extent to which it is able to secure additional equity or debt funding from time to time. The Company shares are currently suspended from trading. For the suspension to be lifted, RRP will need to satisfy ASX that its financial condition is adequate to warrant the continued quotation of its securities. The Directors believe that the Company's financial condition, on completion of the Entitlement Offer, will be adequate to ensure that the current suspension is lifted.

Key risks

- **Operational Risks (continued)**
 - Project Risks
 - The Katingan Ria project is subject to key project risks; a key risk being the logistics, in particular river haulage. The Katingan River is seasonal and the periods where the river is unavailable may be greater or lesser than estimated
 - Additionally, the project is subject to:
 - Environmental risks
 - Social and Community risk
 - Country risk
 - The financial performance of each of RRP's foreign operations may be adversely impacted by current or future fiscal or regulatory regimes, local laws and regulations or changes to the economic, political, judicial, administrative and/or security climate, policies or conditions in those geographies.
 - Legislative and regulatory changes
 - RRP's business is affected by a range of industry specific and general legal and regulatory controls. Changes in these types of controls can have an adverse effect on RRP's financial performance. Further, any major shift in regulatory policy may impact on the profitability of RRP.
- **Acquisition risks**
 - Completion risk
 - The viability of the Katingan Ria project is subject to completion of all licensing and securing adequate investment or off-take agreements and funding.
- **General risks**
 - Market
 - The market price of RRP shares will fluctuate due to various factors, many of which are non-specific to RRP, including recommendations by brokers and analysts, Australian and international general economic conditions, inflation rates, interest rates, changes in government, fiscal, monetary and regulatory policies, global geopolitical events and hostilities and acts of terrorism, demand for listed securities and investor perceptions. In the future, these factors may cause RRP shares to trade at a lower price and/or cause the value of New Shares to rise or fall below the Issue Price. Stock markets, including the ASX, have exhibited increased volatility in recent times as a result of economic conditions. Continued volatility could negatively impact the value of RRP shares.

Key risks

- **General risks (continued)**
 - Exchange rate risk
 - RRP operates internationally and faces foreign exchange rate risks associated with foreign currency denominated debt, input costs and offshore earnings.
 - Domestic and global economic conditions
 - The financial performance of RRP could be affected by changes in economic conditions in Australia and overseas. Such changes include:
 - Changes in underlying cost structures for labour and service charges;
 - Changes in fiscal, monetary or regulatory policy by governments or government agencies or instrumentalities, including in relation to inflation and interest rates, which may impact the profitability of RRP or a general fall in the demand for RRP's products;
 - Declines in aggregate investment and economic output in Australia or in key offshore regions; and
 - National or international political and economic instability or the instability of national or international financial markets including as a result of terrorist acts or war or the recent dislocation in credit and capital markets.
 - Asset impairment
 - The RRP board regularly monitors impairment risk. Consistent with accounting standards, RRP is periodically required to assess the carrying value of its assets. Where the value of an asset is deemed to be less than its carrying value, RRP is obliged to recognise an impairment charge in its profit and loss account. Impairment charges can be significant and operate to reduce the level of a company's profits and potentially, its capacity to pay dividends. Impairment charges are a non-cash item.
 - Changes in accounting policy
 - Accounting standards may change. This may affect the reported earnings of RRP and its reported financial position from time to time.
 - Taxation
 - Future changes in taxation law, including changes in interpretation or application of the law by the courts or taxation authorities in Australia, or other relevant jurisdictions in which RRP operates, may affect taxation treatment of an investment in RRP shares or the holding and disposal of those shares. Further, changes in tax law, or changes in the way tax law is expected to be interpreted, in the various jurisdictions in which RRP operates, may impact the future tax liabilities of RRP.
 - Litigation
 - As with all businesses, RRP is exposed to potential legal and other claims or disputes in the course of its business. Although RRP seeks to minimise the risk of such claims arising, and their impact if they do arise, such claims will arise from time to time and could adversely affect RRP's business, results of operations or financial condition and performance.
