## **QUARTERLY UPDATE**

- **Continuing focus for Katingan Ria's domestic coal supply strategy**
- **Alumicor – discussions underway with potential investors/buyers**
- **Business development activities aimed at enhancing and/or realising the value of Realm's assets as well as seeking new resource sector investment opportunities, particularly those with near term cash generation potential**

**Realm Resources Ltd. (ASX: RRP) ("Realm" or the "Company")** is pleased to provide an update on activities during the quarter.

### **Katingan Ria Coal Project – Focussed on Domestic Power Station Supply**

The Company continued to engage with PLN (Indonesian State owned Electricity Corporation) and other potential partners/buyers in order to progress its power station strategy. Realm is focussing on establishing a consortium to prepare for the Kalselteng No.3 (2x100MW) process later this year, and possibly Kalselteng No.1 (2x100MW) as well, should that become available (Figure 1).

In addition, Realm continues to keep its 51% holding in good standing and progress permitting as required.

The thermal coal price for expected Katingan Ria coal (i.e. 4,200 kcal/kg GAR) has declined further to US\$28.80/t at the time of writing. This together with the slow pace of Government action is limiting interest in the project and the coal sector as a whole.

### **South African Projects**

In South Africa, good progress has been made on the search for potential investors/buyers seeking exposure to the aluminium re-cycling sector as well as improving the financial and operational performance of Alumicor. In platinum, the Rooderand transaction with Chrometco Limited was advanced following the receipt of the Nkwe prospecting right renewal paving the way for the final 35m JSE:CMO shares to be issued to Realm on completion.

In addition, management continues to assess a number of growth projects in the rapidly expanding aluminium recycling space, and has

embarked on a process to seek funders and/or partners seeking exposure to or interested in developing the business.

In July, Alumericor was awarded a one year contract to process an additional 150 to 160 tonnes of aluminium dross per month.

### **Business Development**

On the business development front, numerous resource sector opportunities continue to be reviewed, with the focus directed at projects or mines with near term cash generation capacity, largely in the coal, base and precious metals sector.
